INSTRUCTIONS

01

Lay penguin belly up, then fold top corner to corner along line (a), as diagram.

Make a crease along line (b) in both directions, then unfold

Open it up into a square and fold again in the opposite direction.

02

Fold one side of triangle along dotted line (c).

Repeat on the opposite side to create the penguin wings.

The beak line should meet along the edge.

03

Fold along dotted line (d), the corner should just pass the edge of the paper.

Turn over and repeat.

04

Fold both sides of beak along dotted line (e) in one direction.

Turn over and fold in the opposite direction.

Open back up to the original position.

05

Open triangle up along line (a) to form a diamond shape.

Fold down along line (f) so beak point touches line (a).

Fold upward along line (g), orange beak, shown in circle diagram.

06

Fold centre line (a) and outside reverse fold line (e) simultaneously.

Can be awkward, so ensure folds are created well.

The head should now be either side of the body and the wings exposed.

07

Inside reverse fold lines (b), (already creased in step 1), by pushing through centre of penguin as shown in circle.

08

YOUR CHILLI PENGUIN IS COMPLETE!

Name your penguin and show them off, we love pictures of the penguins on their adventures ... or looking cosy at home.
